Your LinkedIn method, running on every account you manage.

You bring the strategy. We bring the infrastructure that carries it out, safely and at scale, so your time goes on clients and conversations.

AGENDA
Your business first · then the system · then where it could take you

Before we show you anything, we want to understand how you win business today.

- **Your business** — 3 questions
- Your clients — 3 questions
- Your method — 3 questions
- Your pipeline — 3 questions
- Your time — 3 questions
- Risk and limits — 3 questions

Your business

Q01 Walk us through Brand Stand today: what you sell, who buys it, and what a client is worth to you over a year.

Why we ask: Sets the value of every conversation the system creates.

Q02 Where does new business come from right now, in rough order?

Q03 What does a great year look like, and what number are you building toward?

15:00
Your time to talk.
We listen and take notes.

Start

18 questions across six themes. Use them as a guide, not a script.

Nine LinkedIn activities, automated end to end.

01 **Prospect search**

Builds a target list from LinkedIn search and from the people engaging with your posts, filtered by your ideal-client rules.

You approve: the targeting rules and the exclusion list

PROSPECT SEARCH

LIVE ILLUSTRATION · SAMPLE DATA

We learn how you win business for each client, then turn that method into a system that runs on every account.

STEP 1 · WEEK 1

Learn

Sit inside your process, account by account.

STEP 2 · WEEK 1–2

Codify

Write your method down as a playbook.

- Targeting rules and reasons to talk
- Message and comment guidelines per client
- Approval rules: who signs off what

STEP 3 · WEEK 2

Automate

Build the playbook into the system.

STEP 4 · WEEK 3 ONWARDS

Operate

Run it daily, review it weekly.

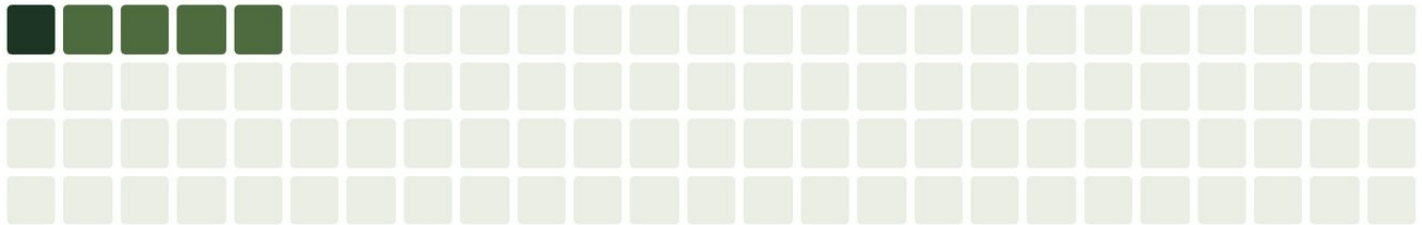

STEP 5 · ONGOING

Scale

Add accounts without adding hours.

One playbook, any number of accounts

5 accounts

Your own account plus 4 client accounts, all running the same playbook, each with its own voice rules and limits.

THE QUESTION THAT SETS THE PLAN

What revenue are you building Brand Stand toward?

We plan the number of accounts, the capacity and the order of work backwards from that figure.

£100k · £250k · £500k · £1m · £1m+

Everything runs on a dedicated UK cloud server, so the work carries on around the clock without your laptop.

A UK cloud server is a powerful computer in a UK data centre that we run for you. Its memory and storage scale up on demand, so it carries one account today and fifty tomorrow, each kept separate, each running from the same steady UK location.

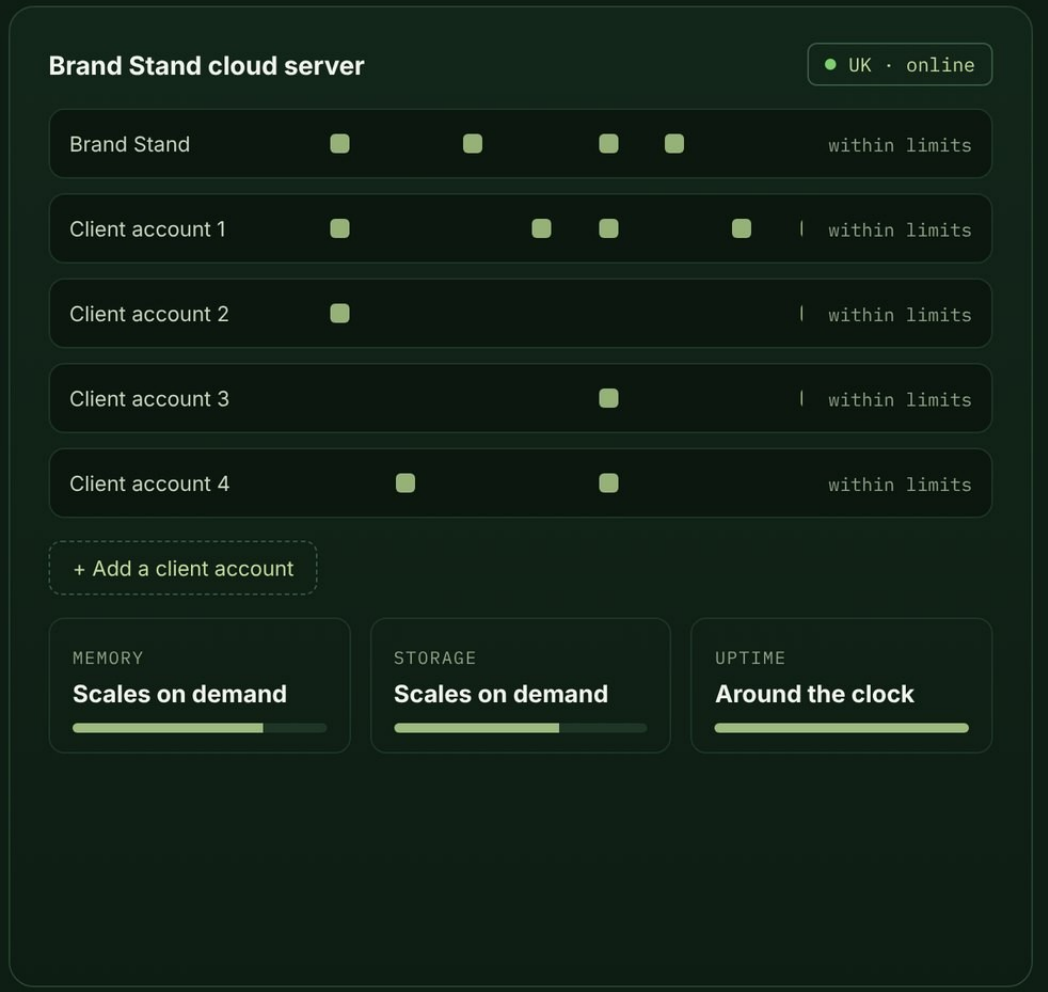

> **We work inside LinkedIn's limits, never around them.** Every account warms up slowly, runs at a human pace with a daily cap on every action, operates from one consistent UK location, and is paused the moment LinkedIn shows any sign of pushing back.

Always on
Runs day and night. Your computer can be closed, travelling or switched off.

Scales on demand
Adding a client means adding capacity in minutes, with no new hardware and no new hire.

Consistent and separate
Each account keeps its own space and a stable UK address, so its activity looks the way a real person's does.

Your edge
Most LinkedIn specialists sell hours. With this, your capacity grows faster than your workload.

Eight ready-made funnels, each built around a pain founder-led businesses feel on LinkedIn.

Discovery call
Plenty of likes, nothing in the diary.

Newsletter growth
Content disappears in 48 hours.

Webinar or live event
Empty seats at your own events.

Community
One-to-one selling does not scale.

Lead magnet
Strangers are not ready for a call.

In-person events
Great conversations, then nothing.

Network reactivation
Thousands of connections, few conversations.

Referral partners
Referrals arrive at random.

THE PAIN — Posts get engagement, but engagement rarely turns into booked calls.

Day 0	**Find** — People who engaged with recent posts and match the ideal-client rules.
Days 1–10	**Warm up** — Likes on two posts and one thoughtful comment.
Day 11	**Connect** — Request at a capped daily pace.
Day 12	**Open** — Thank them and ask one question about their post.
Day 16	**Give** — Share one useful resource. No ask.
Day 21	**Invite** — Offer a short call on the topic they raised.
Day 28	**Close the loop** — A polite last note, then the sequence stops.

BEST FOR
Coaches, consultants and agencies selling a high-value service

WHAT WE MEASURE
Acceptance rate, reply rate, calls booked

YOU APPROVE
Every message in the sequence and the call wording

Six controls keep every account safe, on-brand and in your hands.

Approval
Wording is approved by you before anything is sent in your name.

Daily limits
Every action type has its own cap, set low and raised gradually.

Monitoring
We watch for throttling and failed actions on every account.

Exclusions
Existing clients, contacts and competitors are never approached.

Ownership
Every account, licence and list sits in your name.

Reporting
A weekly update on activity, replies and account health.

The risk, stated plainly. LinkedIn's terms do not permit automation tools, so some account risk always remains. These controls exist to keep that risk low, and we will always tell you where it stands.

You own the strategy and the relationships. We own the machinery and its results.

Discover Week 1 | **Build** Week 2 | **Run** Week 3 onwards | **Review and scale** Monthly

Goal: understand exactly how you win business, account by account.

You

Strategy, voice and relationships

- Walk us through your process for each client account
- Share ideal-client profiles and the people to exclude
- Share example posts, messages and voice notes for each client
- Name who approves what, for you and for each client

Extol

Set-up, operation and results

- Interview you and map your current process step by step
- Audit each account: profile, network, activity and risk
- Define targeting rules and reasons to talk per account
- Agree success measures and the reporting format

The system

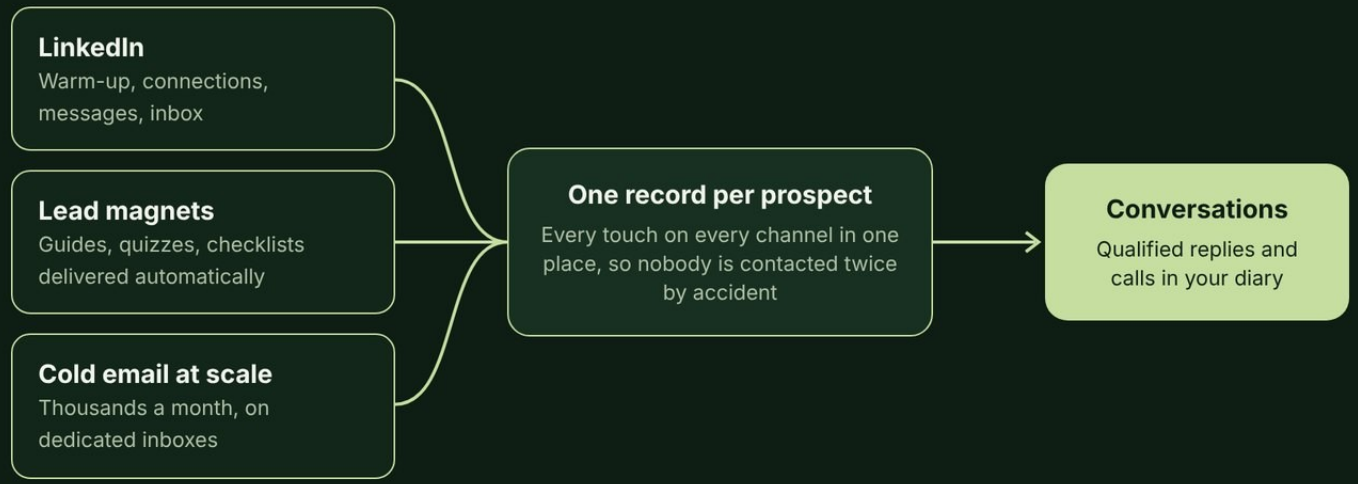

Runs around the clock on the UK server

- Server set up in the UK, in your name
- Accounts connected securely, one space each
- Nothing is sent yet

OUTCOME A written playbook for every account, signed off by you.

LinkedIn works on its own. Add lead magnets and cold email, and each channel feeds the others.

LinkedIn only | + Lead magnets | **Full engine**

Email to LinkedIn
People who open but do not reply are warmed up on LinkedIn.

LinkedIn to email
Accepted connections get one short email from your own address.

Email to lead magnet
Cold emails offer the resource, not a call.

One record
Nobody gets the same pitch on two channels in the same week.

Cold email capacity planner

10,000 emails a month

SENDS PER WORKING DAY	INBOXES SENDING	SPARE INBOXES WARMING
455	16	8

TOTAL INBOXES	SENDING DOMAINS	CONTACTS ENRICHED AND VERIFIED A MONTH
24	12	≈3,300

What we need from you: the go-ahead to buy domains and inboxes in Brand Stand's name, a data budget for enrichment and verification, and three weeks of warm-up before the first send. Your main domain is never used for cold email.

UK rules: limited companies can be emailed on legitimate interest with a clear opt-out. Sole traders and partnerships need consent, so we filter them out.

Assumes 22 sending days a month, 30 emails per inbox per day, 2 inboxes per domain, half as many again kept warming as spares, and 3-email sequences. Catch-all addresses are skipped.
